PROFILE

IT professional with experience in Microsoft 365 administration, Windows endpoint support, identity and access management, infrastructure migrations, and incident resolution. Transitioning into cybersecurity through an MSc in Cybersecurity and Information Assurance at Mahidol University, supported by security labs and platform security work. Also manages TokenToAPI, an AI API platform providing model access, API key management, and usage tracking. Holds ITIL 4 Foundation, ISC² Certified in Cybersecurity (CC), Microsoft Azure Fundamentals (AZ-900), and Microsoft 365 Fundamentals (MS-900) certifications.

PROFESSIONAL EXPERIENCE

TokenToAPI

Sep 2026 – Present

Co-founder & Platform Operator (Self-employed)

- Manage TokenToAPI's AI API platform, including access controls, API keys, model access, usage tracking, application deployments, and operational troubleshooting.
- Harden authentication and redemption flows through account-level failed-login lockouts and cryptographically random recharge codes; validate controls through tests and deployment checks.
- Address payment retry and recovery issues through webhook validation, idempotent reconciliation, and refund handling; verify fixes with regression tests and production checks.
- Deliver TokenToAPI Connect releases for macOS and Windows, with model discovery, client configuration, backups, restore workflows, and signed in-app updates.

City Holdings Limited

May 2022 – Jun 2024

Information Technology Coordinator · Yangon, Myanmar

- Resolved escalated hardware, software, network, and access incidents within agreed SLAs through structured troubleshooting and accurate IT service management records.
- Administered Microsoft 365 and Entra ID accounts, licensing, groups, and permissions; configured conditional access and supported tenant-to-tenant migrations, forest trusts, and Azure AD Connect deployment.
- Managed device procurement, configuration, and retirement; supported Windows 10/11 endpoints and Intune-aligned patching, encryption, and protection policies.
- Streamlined onboarding and offboarding through IT asset and account management workflows; maintained technical runbooks, onboarding checklists, and staff training.

CE Global Pte Ltd

Aug 2024 – Sept 2025

E-Commerce Specialist · Singapore, Remote

- Maintained e-commerce and back-end data accuracy through structured troubleshooting of data discrepancies and operational issues.
- Coordinated international logistics and supplier relationships, working remotely with colleagues across markets to support order fulfilment.

KMD Group of Companies

Dec 2022 – Mar 2023

Internship Trainee · Yangon, Myanmar

- Provided first- and second-line support for computers and servers, troubleshooting hardware and software issues within the IT service centre.
- Assisted with asset procurement and customer follow-up, communicating issue status and supporting service requests through to resolution.

TECHNICAL SKILLS

Microsoft & Identity: Microsoft 365 administration, Microsoft Azure, Entra ID (Azure AD), Active Directory, Intune, Azure AD Connect, conditional access, forest trusts

Systems & Endpoint Management: Windows 10/11, Linux (Ubuntu, Kali Linux), device configuration, patch management, encryption, configuration backup and recovery

Networking: TCP/IP, DNS, DHCP, VPN, Wi-Fi troubleshooting, Cisco Packet Tracer, basic firewall concepts

IT Service & Security Management: ITIL 4, ISO 27001, incident escalation and response, SLA management, risk assessment and mitigation, IT asset lifecycle, contingency planning, technical documentation, user training

Security Assessment & Forensics: Wireshark, Burp Suite, Autopsy, FTK Imager, PKI/OpenSSL, vulnerability analysis, authentication controls

AI & Automation: n8n, agentic workflow automation, Model Context Protocol (MCP), prompt design, model discovery and configuration, webhooks

SELECTED PROJECTS

TokenToAPI Connect — *Personal / Product Development* · GitHub

- Simplified AI client setup on macOS and Windows by building a desktop configurator for model discovery and selection across Claude, Codex, Gemini, and Grok, with more integrations coming soon.
- Protected existing settings with configuration backups, atomic writes, and restore workflows; added signed updates and single-use imports that keep permanent API keys out of URLs.

Aster Fraud Analysis — *Academic / Research* · GitHub

- Detected 44 of 60 planted fraud cases with 12 false alarms on an 800-claim synthetic test set using Random Forest, compared with 24 detections and 35 false alarms for baseline rules; used chronological data splits and validation-based model selection.

Cloud Vulnerability Prioritisation — *Academic / Research* · GitHub

- Co-authored a retrospective study of 13,819 network-exploitable CVEs, comparing CVSS, EPSS, and three machine-learning models against CISA KEV labels. EPSS performed best in the saved test results; documented later score snapshots and only 10 positive test cases as limits on predictive claims.

Samsung Tracking Tag Application Forensics — *Academic / Research*

- Analysed published research on Samsung tracking-tag applications, explaining how device identifiers, location records, and surviving SQLite/XML artefacts can support forensic investigations.

OWASP Top 10 Web 2025 – Capture the Flag — *Personal*

- Completed controlled exercises covering SQL injection, cross-site scripting (XSS), broken access control, and insecure configurations.

EDUCATION

Mahidol University | Aug 2025 – Present · Nakhon Pathom, Thailand
MSc – Cybersecurity and Information Assurance (International Programme)

University of Greenwich | Feb 2020 – Feb 2023 · Yangon, Myanmar
BSc (Hons) Computing – Network Systems

NCC Education · Yangon, Myanmar
Level 5 Advanced Diploma in Computing (Jan 2021 – Jan 2022)
Level 4 Diploma in Computing (Jan 2020 – Jan 2021)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

ITIL 4 Foundation · ISC² Certified in Cybersecurity (CC)
Microsoft Azure Fundamentals (AZ-900) · Microsoft 365 Fundamentals (MS-900)
Oracle Cloud Infrastructure Foundations Associate · OCI AI Foundations Associate (2023 award)
Career Essentials in System Administration · Career Essentials in Generative AI — Microsoft & LinkedIn

Languages: English (fluent, professional) · Burmese (native) · Thai (conversational)
